

# Keep costs down with efficient eco-printing

The WorkForce Pro WF-C5000 Series of multi and single function printers can save on print costs and help lower your energy consumption. Precision printing also delivers industry-leading output quality at high speed, for sharper text and finer lines.

## Print high-quality images

## Print small or fine text very clearly

PrecisionCoreprintheadtechnologydelivers Epson's renowned, industry-leading output quality at high speed. Inch for inch, the high-resolution Epson print chips are one of the fastest inkjet printing technologies in the world. PrecisionCore piezo elements each fire nearly 50,000 times per second. PrecisionCore has up to triple the nozzle density of conventional Epson piezo printheads. These nozzles are roughly 20 microns in diameter and deliver small, round, repeatable dots about 40 microns across. This dot precision is particularly important for creating sharp text and fine lines. PrecisionCore introduces a new system that uses the power of the piezo crystal itself to raise reliability. The piezo element is able to generate a voltage that can detect in milliseconds whether it is firing normally. It has the ability to self-diagnose its health almost instantly.

WorkForce Pro WF-C5000 Series

# Build a more productive workplace

The WorkForce Pro WF-C5000 Series of multi and single function printers will help you to avoid hidden spend, like the employee productivity costs associated with centralised printing. While other printers stop to demand more paper and ink, the WF-C5000 Series keeps going, without interrupting your workflow. Time is valuable to any business and a fast printer that can print up to 10k pages without changing supplies<sup>4</sup> is a vital part of your team.
